Product Positioning

Lightweight Private AI Agent · Not an Enterprise AI Brain

STA-100 is a **lightweight AI assistant** — not a heavy enterprise AI system. We don't compete with server-class AI workstations, cloud AI platforms, or multi-GPU deployments. Instead, we serve a clear, underserved market: **professionals and small teams** who need reliable, private, always-on AI assistance **without enterprise complexity or budget**.

Professionals

White-collar workers, developers, geeks, hobbyists needing daily life assistance, scheduling, document filing, file processing, client coordination.

Small Businesses

Small SI vendors, law firms, dental clinics, accountants, PPT creators, language learners — digital assistants without enterprise budget.

E-Commerce Teams

Small e-commerce companies needing customer data management, product tracking, competitor monitoring without data exposure risk.

Personal Use

SMB Focus

Growth Markets

Not our market today: Industrial automation · Medical AI · Transportation AI · Maritime AI · Water utilities · Large-scale enterprise deployments · Video/voice AI generation · Complex GUI workloads

2

Why STA-100 is a **Must-Have**

Four core reasons that set it apart from any cloud or server solution

Local Deployment · Data Never Leaves

All data processed and stored within your own network. True data sovereignty — no cloud dependency, no privacy risk. GDPR, data sovereignty, and privacy compliance built in.

Plug & Play · 30-Minute Setup

No IT specialist required. No complex configuration. Unbox, connect, power on — OpenClaw is pre-installed and ready. Professional installation guide included.

24/7 Always-On Gateway

No screen, no maintenance required. Just plug in and forget. STA-100 acts as a tireless AI colleague, always ready to respond — from any device, at any time.

Pure OpenClaw · No Third-Party Plugins

Native OpenClaw installation. No bundled apps, no forced updates, no hidden background processes. Fully isolated from your core data systems.

01

SELLING POINT 1

Local Deploy · Data Privacy

"Your data stays in your office — not in someone else's cloud."

Complete Local Architecture

STA-100 processes all data internally — no public cloud transit, no third-party data handlers. Employee schedules, client documents, contract drafts, sensitive business files — always stored within your own network.

Compliance Ready: GDPR compliance · Data sovereignty · Privacy protection requirements — all natively supported by the local-only architecture.

What This Means for You

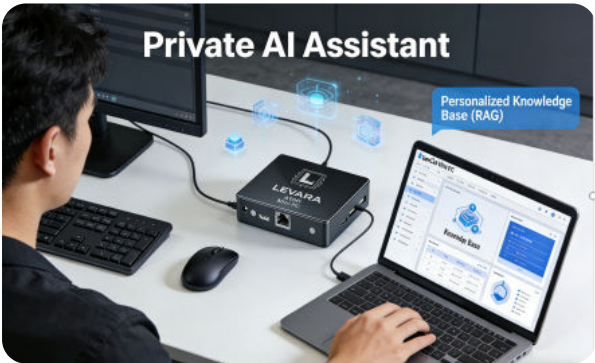

You control where every byte lives. No subscription to maintain, no cloud vendor to trust, no data policy to negotiate. It's your data — it stays your side.

SELLING POINT 2

SELLING POINT 2

Easy Install · Quick Start

"Plug in and go — no technical background needed."

30-Minute Out-of-Box Experience

Complete visual installation guide included. Connect power, plug into network, follow the guided setup — and your AI assistant is running. No command line, no IT specialist required.

OpenClaw Pre-installed — the intelligent agent platform is ready the moment you power on. Your team can start interacting immediately via Feishu, WeChat, Telegram, or Discord.

Designed for Non-Technical Users

The entire setup process is visual, step-by-step, and reversible. If you can follow a user manual, you can deploy STA-100.

SELLING POINT 3

SELLING POINT 3

24/7 Always-On Gateway

"An AI colleague that never sleeps, never takes a break, never needs a screen."

Zero Maintenance, Always Ready

No screen required. No computer to keep on. Simply plug in the power and STA-100 becomes a tireless AI colleague that never clocks out — available from any device, at any hour.

Always-On means always available: Send a message via Feishu, WeChat, Telegram or Discord — STA-100 receives your request, executes the task, and reports back. No app installation on your side required.

No Dependency on User Devices

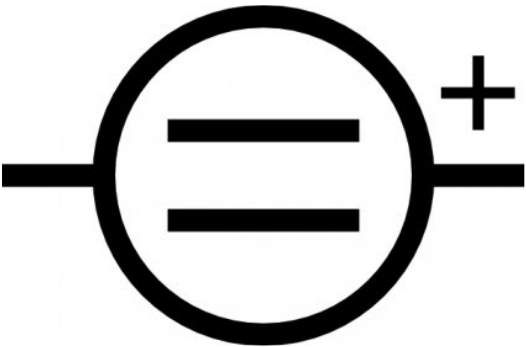

Unlike traditional AI tools that require a laptop or phone to be active, STA-100 runs independently. Your AI assistant keeps working even when you're away.

SELLING POINT 4

SELLING POINT 4

Native Security • Pure Operation

"No bloatware. No hidden processes. Just your AI assistant."

Original OpenClaw • No Modifications

STA-100 runs original OpenClaw — no third-party customizations, no bundled plugins, no forced update cycles. Self-upgrade locally. Nothing extra, nothing hidden.

Isolated from core data systems — STA-100 processes only the tasks you authorize. It cannot access your internal servers, databases, or confidential systems without explicit permission.

Your Security Checklist

- ✓ No third-party bundled apps
- ✓ No forced update notifications
- ✓ No hidden background processes
- ✓ Fully isolated task execution
- ✓ Local upgrade authority

TECHNOLOGY FOUNDATION

Built for Reliability

ARM-based architecture · Linux 5.15 + XFCE · Seamless LLM integration

Hardware Specifications

Industrial-grade build · 6-layer gold-plated PCBA · ARM Cortex architecture

ARM Octa-Core

Allwinner A527 · Cortex-A55

4GB LPDDR4

High-speed multi-task

32GB eMMC + MicroSD

Up to 512GB expandable

CONNECTIVITY

Wi-Fi	Dual-Band 5G / 2.4G
Ethernet	RJ45 Gigabit
Bluetooth	BT 5.0 Built-in
USB	USB 3.0 × 1 + USB 2.0 × 1
Display	HDMI (Licensed)
Power	DC 12V / 2A

FORM FACTOR

Chassis	Desktop / Wall-mount
Dimensions	Compact · Portable
Power	< 15W TDP
Cooling	Silent fanless design
PCB	6-Layer Gold-Plated
Certification	CE / FCC / RoHS

Industrial-grade PCB: 6-layer gold-plated PCBA ensures premium signal quality and anti-EMI performance for long-term stable operation.

Software & LLM

Linux 5.15 + XFCE Desktop · Pre-installed OpenClaw · Multi-LLM Compatible

Linux 5.15 + XFCE Desktop

Mature kernel with lightweight XFCE environment — low resource usage, high stability, professional appearance.

One-Click AI Start

Zero门槛 — AI agent environment launches instantly. No command-line knowledge required.

DESIGN PHILOSOPHY

One Device · One Role

STA-100 uses a "one device, one role" design philosophy. One device owns one core responsibility, with internal AI agents collaborating to handle complex tasks. Start with your most urgent need — then expand gradually.

Lawyer Assistant

Schedule management, document filing, contract drafts, client communication

E-Commerce Manager

Customer data, product tracking, competitor monitoring, order management

Dental Practice Helper

Appointment scheduling, patient records, follow-up reminders, report generation

PPT Creator Assistant

Research, outline, draft, design suggestions — from idea to presentation

APPLICATION SCENARIOS

Where STA-100 Shines

Designed for the real day-to-day work of professionals and small teams

Office Professionals

Schedule management, document filing, email drafting, meeting prep

E-Commerce Ops

Competitor monitoring, product listings, customer support, data reports

Developers & Hobbyists

Browser automation, agent experiments, private knowledge base

Work 24/7 without you. Send instructions via Feishu, WeChat, WhatsApp or Telegram — STA-100 automatically executes browser tasks. You only issue commands; repetitive work is fully handled by the device.

WHAT'S INCLUDED

Complete Package

Standard Package

- ✓ STA-100 Host × 1
- ✓ DC Power Adapter (12V/2A) × 1
- ✓ HDMI High-Speed Cable × 1
- ✓ Quick Start Guide × 1
